

# CONSERVATION AGRICULTURE

## MALAWI, AFRICA

Conservation agriculture methods help replenish the nutrients in the soil, retain soil moisture, and reduce weeds – all of which result in higher production of food crops for families in Africa. As farmers see the results, other nearby farmers begin to adopt the methods.

Farmers join “farmers clubs” which incorporate training in new, improved farming methods, solving of common issues faced by farmers, joint marketing strategies etc. The clubs meet in the Church building where the local pastor leads in Bible studies and prayer. As conservation agriculture spreads from village to village, so does the Church!

## DONATE:

Send a cheque payable to “the Church of the Nazarene Canada” to the National Office, 3657 Ponytrail Dr. Mississauga ON L4X 1W5

- Or on our website [www.ncmcanada.ca](http://www.ncmcanada.ca)
- Or phone 1-888-808-7490 or 905-602-8220 Ext.2
- Or by E-transfer to [churchofthenazarenecanada@gmail.com](mailto:churchofthenazarenecanada@gmail.com)

Specify: Conservation Agriculture
